

KSBDC Tech Center Client Shoutout- HCI Energy

“Encountering Innovation was a huge success for HCI Energy and helped us gain knowledge and leads into the military,” said Kevin Kowalik, Vice President of Sales and Marketing for HCI Energy. "Our experience with the SBDC was fantastic. We would highly recommend that all small businesses use their service.”

HCI first contacted the Kansas SBDC Tech Center in 2019 when they applied to present at the annual Encountering Innovation conference. Kansas SBDC advisors prepped the HCI team for Encountering Innovation and served as influencing advocates.

HCI Energy, located in Lenexa, Kansas, is an energy company founded by Ray Ansari that has taken a revolutionary approach to delivering reliable, renewable energy on demand. Their self-contained Hybrid Cube can power communities, military ops, disaster relief efforts, and many other important initiatives more effectively and at a lower cost.

The Kansas SBDC Tech Center works with business owners to help them run their existing businesses while expanding through research and development. For more information, [contact us here.](#)
